(1) DAFFODIL, Large Cup

MOTHER CATHERINE GRULLEMANS. The milk white perianth is of heaviest texture, completely overlapped, forming an almost perfect circle. The huge flat cup is creamy ivory with an apricot ring $\frac{1}{4}$ " from the outer edge. Cup fades to cream white as flower matures. Then the exquisite form of the flower is best appreciated. 60c each; 3 for \$1.50; 5 for \$2.25; 10 for \$4.25

(2) DAFFODIL, Giant Trumpet

PEERLESS GOLD. Brilliant golden yellow of great size and beauty. Perfectly formed and substantial. Tall, vigorous, weatherproof, does not droop. You'll surely take prizes with this one. 45c ea.; 3 for \$1.25; 5 for \$1.85; 10 for \$3.50.

(3) DAFFODIL, Triple Cup

(5) TULIP, Crystal

Mrs. Park keeps an experienced and critical eye on the bulb trials. It is rare indeed, when anything is offered which is not truly superior. Here she is shown looking approvingly at a planting of Crystal Tulip Sothis.

SOTHIS. Large goblets of deep crimson, almost blood red, intensified, but softened by the exquisite crystalline lacelike fringe, characteristic of this new group. You'll have to see this. 10 for \$1.50; 25 for \$3.50

(6) TULIP, Peppermint Stick

Spectacular Candy-striped Tulips

(9) TULIP, Bouquet

BLENDED MIXTURE. A whole bouquet from every bulb. Four, five and more dazzling tulips from a single stem instead of the usual one! You'll like the outstanding effect they give in beds or borders. Each bulb produces a "bouquet" of 3-5 or more big blooms $2\frac{1}{4}$ " or more in length and breadth. Even when planted in a single row, they furnish enough flowers for a really effective showing. When cut, a single plant provides an arrangement. Even the older varieties are still so new, they are not generally offered.

BLENDED MIXTURE. Especially prepared from the 14 choice varieties we list for color balance. 10 for \$1.50; 25 for \$3.00; 50 for \$6.00; 100 for \$12.00.

Here is part of our Trial Garden. Hundreds of varieties are evaluated.

Dear Friends:

Wouldn't it be fun to see every variety and species of bulb described in this book in full bloom? If you could see the most promising new varieties from Holland ranged beside them, wouldn't you feel that you could choose the best in all the world for your garden?

You're cordially invited to visit us during the Spring blooming season, to see just such a display.

Our extensive and costly trial program qualifies us to recommend with authority the varieties which "pass the grade." We feel that this is an invaluable service to you. It assures you that the bulbs you get from Park, are the best varieties, the best available in all the "Floral Kingdom."

We'll look forward to hearing from you. It will be a pleasure to serve you. You'll like our service, too, and perhaps even appreciate this gentle reminder, if because of it, you plant these lovelies in your garden.

GIANT DOUBLE GLOXINIAS

A well grown Double Gloxinia is one of the most spectacular of house plants, normally having about 20 blooms open, completely crowning the plant, and 20 or 25 additional buds ready to carry on the procession of bloom for several months. The extra petal-age adds a lot of extra color area by comparison with single varieties; making for a far more colorful display.

We have selected from a large lot of plants the finest doubles. These we propagated by an expensive vegetative method to insure you that the first named varieties ever offered would be 100% double, 100% true; the finest Double Gloxinias in the world by Park. Easily grown too.

You'll thrill to a brand new effect, elicit the admiration of your friends, for these are, of all Gloxinias, most beautiful.

Begonias and Gloxinias for Christmas

Start our stored bulbs in September or early October in 6" pots of Sphagnum Moss. Use a South window or greenhouse where a temperature of 70-75 deg. will be maintained. When the plants are growing well, provide extra light. (A fluorescent light or 60 watt bulb 2 ft. from the plant will do), so that the plants have daylight, supplemented by electric light totalling 14-16 hours a day. This day-length keys the plants for blooming.
